

Push-to-talk solution for jobsite communications and construction materials dispatch

Over 200 global construction teams use Zello's push-to-talk solution to communicate and collaborate on and offsite. From construction materials dispatch to jobsite-wide emergency alerts, Zello offers unparalleled reliability and scale for real time communication when every second counts and the stakes are high.

Why Customers Choose Zello

Easy to setup, easy to use: Most deployments take less than a day, and most users need less than a minute to learn how to use the app.

Scales with your needs: With over 130 million users, Zello is the most popular push-to-talk software worldwide. It supports channels with up to 7,000 users.

Reliable and secure: 99.99% uptime and end-to-end encryption give you peace of mind.

Centralized management: Configure users, channels, access rights, and application settings – all from your web browser.

Cost-efficient: Trial the complete solution for free and choose between pay-as-you-go flexibility and contract savings.

Advanced dispatch capabilities: Scale dispatch operations to dozens of dispatchers and never miss a call with a shared call queue.

GPS location and emergency alerts: Keep workers safe with a panic button and location tracking.

Unlimited range, global coverage: Zello is available worldwide and translated into 22 languages.

Works with industry-leading software: Zello is even easier to use when integrated with industry solutions from our software partners. API and SDK are available for free.

Broad spectrum of supported hardware: Use Zello on phones or tablets you already have or choose from one of Zello-certified rugged devices or accessories.

“The company has saved a considerable amount per month in just radio tower fees and repairs alone. Zello has definitely improved customer response times, employee experience, and productivity.”

Andrew Eger, Communications and Distribution Technology Manager at Commercial Ready Mix Products, Inc. (CRMP)

How It Works

-  **1** Set up your network of group channels and customize who talks to whom.
-  **2** Install Zello on connected devices and point the app at your network.
-  **3** Push to talk! Enjoy instant live voice and send images and texts.

Keep Projects On Time & Under Budget

Inclement weather, unexpected road closures, poor team coordination, and unvoiced safety concerns can delay or even halt construction projects. Zello empowers frontline workers by giving everyone an ability to instantly communicate to the entire team, quickly locate people or resources to unblock progress, and call for help in case of emergency. This leads to better decisions, faster turnaround time, and less expensive mistakes.

Use Accessories

Accessories like headsets, buttons, and microphones allow Zello users to hear clearly in exceptionally loud environments and while their hands are busy. We work closely with accessory vendors to ensure that approved devices are truly push-to-talk, even while locked or running Zello in the background.
